I am highly passionate about web development and security. I like to think I am a connoisseur of clean and concise code; a way of being which has been developed over the years working with some of the most pervasive frameworks to the more obscure, giving me a breadth of reference. I truly enjoy transforming dreams into system requirements and ultimately into concrete products.

SKILLS

Frontend

HTML CSS SCSS Javascript
Typescript

Backend

Node Typescript Golang Ruby
Java Python PHP

Database

MSSQL Postgresql Mysql
MongoDB

Frontend Frameworks

React Vue Angular Svelte

Backend Frameworks

Expresjs Gatsbyjs Nextjs
Strapijs Spring Boot
Ruby on Rails

CMS

Contentful Strapijs WordPress
Shopify

etc.

git TDD Extreme Programming NPM bundler gradle Pivotal Cloud Foundry AWS Netlify Vercel
Jenkins TravisCI Codecov Kibana Datadog Sentry Grafana Docker docker-compose Kubernetes
Whitesource Veracode Contrast Twistlock Nexpose 12 Factor Applications Graphql RESTful RPC
NativeScript React Native

WORK EXPERIENCE (5)

Full Stack Developer at Enova   **Mar 2020 - Current**

📍 Chicago, IL   https://www.enova.com

- Tech Stack: Golang, Ruby, Ruby on Rails, Vue, React, Enzyme, Codecov, SQS, Docker, Kubernetes
- Built an internal SCA scanner service with an HTTP API that supports golang, ruby, and javascript projects and supports monolithic applications. This was done in the mindset of the Enova value of 'Operating as an Owner'. I saw a need for a service and implemented it.
- Working to extract financial accounting from a legacy monolith system to a new micro-service based system.
- Working to drive the initiative of enterprise containerization.
- Implementing neglected frontend test coverage on React and Vue applications using Enzyme.

Co-Founder / Architect at Slixites   **Aug 2020 - Current**

📍 Chicago, IL   https://www.slixites.com

Slixites is a family owned software development consulting firm based in the Chicagoland area.

Full Stack Developer at Allstate   **Jan 2019 - Mar 2020**

📍 Chicago, IL   https://www.allstate.com

- Tech Stack: Java, Spring Boot, JPA, JUnit, Mockito, PowerMockito, React, Redux, react-router, Normalizer, Jest, Enzyme, fetch-mock, Node, Express, super-test, Docker, Jenkins, Cloud Foundry, Kibana, Graphana, MS Suite

- Developing internal systems to provide secure application deployment across the enterprise utilizing modern webframeworks, standards and security practices.

- Actively engaged in TDD and XP practices.

- Wrote both Unit and Integration/End to End testing.

- Followed best practices with regards to CI/CD deployments.

- Wrote scalable and maintainable code following 12 factor and SOLID principles.

- Worked with/on Monolith and Microservice based applications/systems.

- Integrated with a variety of 3rd party APIs including: Veracode, Whitesource, Contrast, Twistlock, Nexpose/Rapid7, VersionOne, MS Teams, etc.

Director of Development at Youtech   **Jun 2018 - Jan 2019**
 Naperville, IL   https://www.youtechagency.com

- Maintained and grew new and existing client relationships.

- Managed a team of 7 developers both local and remote.

- Implemented workflow standardizations; including git, code reviews, and testing.

- Conducted meetings on both a team and personal level.

- Personal & professional development of team through promoting sponsored events and lightning talks/lunch and learns.

Full Stack Developer at Youtech   **Sep 2017 - Jun 2018**
 Naperville, IL   https://www.youtechagency.com

- Tech Stack: Node, Express, EJS, Angular 2+, RxJS, NativeScript, MongoDB, Mongoose, MYSQL, MSSQL,Magento, WordPress, Shopify

- Independently planned, prioritized, and executed development of complex custom web and mobile applications.

- Interfaced with external and internal clients from design to marketing to C-suite executives and stakeholders on project needs and status.

- Troubleshot abd resolve WordPress and Magento third party plugin/extension installation conflicts/incompatibilities.

- Created custom WordPress and Magento plugin/extensions.
